

MONOCLONAL ANTIBODY PLATFORM

www.diaclone.com

DIACLONE and SEED Biosciences
collaborate to optimize a new workflow
for a faster and more efficient
antibody development process

DISPENCELL, Next Generation Single Cell Dispensing
The automated laboratory instrument for cloning
Fast, easy and gentle **single cell isolation**
Validation of monoclonality in only One Step

Antibody development custom service Aiming for the Best!

Diaclone  A complete Antibody engineering platform:

- Antibody development: hybridoma and phage display technologies
- Antibody sequencing
- Analytical services: characterization, validation, quality controls... (ELISA, cytometry, Octet, cell based assays ...)....

FOR RESEARCH USE ONLY
